

Discontinued: CTs Series

After several years and many units sold, Crown officially announces the discontinuation of CTs Series amplifiers. Current inventory is expected to sell out in April/May. For any critical needs, place orders now. If you are designing or specifying jobs for May or beyond, consider using the Crown DriveCore™ Install (DCi) Series, and place orders soon to ensure availability.

DCi advantages over CTs

- Crown's latest DriveCore technology is in the DCi amp range
- Way more energy efficient...about 60% more energy efficient than CTs
- Since each DriveCore chip replaces more than 550 parts – it makes DCi products extremely reliable
- In head-to-head listening tests DCi is consistently chosen for having better sound

CTs → DCi Conversion Chart

CTs	DCi
600	2 300
1200*	2 600
